

i am writing as a citizen of new jersey at the behest of the governor's office to share with you my opinion that our state "do not call" law is sufficiently stringent, but not moreso, and need not be weakened through the action of any federal body.

if any business which has had dealings with me in the past 18 months wishes to contact me, they can do so through the same channels they used to bill me. none have ever sent me an "oral" invoice.
